

COVID-19 Guidelines

RE: Implications of COVID-19 on operation of the *CRYOTherm* Hydrotherapy System.

According to the CDC there is no evidence that COVID-19 can be spread to people through water in pools, hot tubs, spas, or water play areas, see the link below.

<https://www.cdc.gov/coronavirus/2019-ncov/community/parks-rec/aquatic-venues.html>

Suggestions for the safe use of CRYOTherm Hydrotherapy Systems to prevent COVID-19 transmission:

1. Set a tank capacity to allow proper distancing between users.
2. Do not allow athletes with a fever or respiratory symptoms to use the tanks.
3. Wipe down external surfaces frequently (between users) with an antiviral disinfectant.
4. If you currently do not use Bromine in your system, consider its implementation. Instructions for the use of Bromine in the system can be found in the User Manual.
5. Implement any other pertinent CDC guidelines you feel are appropriate.
